

Contribution Validation Report — ONE simulation run only

Case: baseline

Type: Baseline — code noise only, no physics effects

Duration: 600 s

Towers: 5

Receivers: 1

Max PR meas/epoch: 5

Max EKF rows/epoch: 5

Final pos error: 5.7891 m

Pos RMS (last 20%): 5.0627 m

Mean NIS: 5.02 (E[NIS] ~ 5)

Truth effects: none

Model effects: none

Mismatched: none

Output PDF: /Users/ludwigmatuschka/Library/CloudStorage/OneDrive-Persönlich/Dokumente/ICH/Karriere/Cranfield/IRP/Codes/IRP_simulation/oo_v1/output/effect_contribution_validation_report.pdf

Position Error Components (ECEF)

Position Error Norm vs Time

Attitude Error Components

Attitude Error Norm vs Time

Receiver Clock Bias

Receiver Clock Bias [m]

Receiver Clock Bias Error [m]

Receiver Clock Drift / Fractional Frequency

Pseudorange Prefit Innovation RMS vs Time

Pseudorange Postfit Residual RMS vs Time

Normalised Innovation Squared (NIS)

Observations per Epoch

Visible Ground Towers

Total Pseudorange Measurements

Per-Source Error Contribution RMS (Truth – Model)

Receiver Clock Allan Deviation — RxClock (OCXO)

Receiver Clock Allan Variance — RxClock (OCXO)

Tower Clock Allan Deviation $\sigma_y(\tau)$

Per-Tower Clock Bias Histories

Per-Tower Fractional Frequency (Clock Drift) Histories

Observation Count (max meas = 5)

Visible Ground Towers per Epoch

Total Pseudorange Measurements per Epoch

Contribution Overview — Truth and Model RMS [m]

Contribution Overview — Truth-Model Mismatch RMS [m]

Code Noise

Troposphere

Ionosphere

HW Delay

Multipath

Sagnac

*Sagnac
disabled / zero contribution*

Shapiro
